10,754 layers

298 events

11 hazards

Satellite imagery

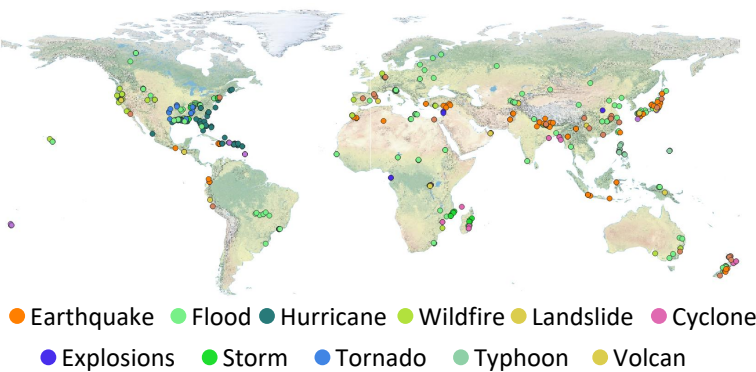

Aerial imagery

Drone imagery

Vector layers

Reports & documents

Metadata

Global coverage (2015-2024)

Events span 6 continents and diverse hazard contexts.

Six Task Families

1

Event Retrieval

RetRieve relevant events and resources given a query.

Query: Severe flooding in South Asia, 2022

2

Map Grounding

Locate and align query entities to geographic coordinates.

Query: Bridge near the river bend

Lat: 27.72
Lon: 85.32

3

Damage Localization

Identify and delineate damage areas or affected assets.

4

Drone Reinspection

Plan and reason about follow-up drone inspections.

...

5

Assessment Synthesis

Integrate multi-source evidence to produce structured assessment.

Impact Dimension	Score (0-5)
Infrastructure	4
Residential	3
Transportation	4
Utilities	2
...	

6

Report Generation

Generate comprehensive disaster reports with evidence citations.

Evaluation Outputs

Task Scores

• Per-task performance (e.g., F1, IoU, Recall@K)

• Aggregated benchmark scores

Evidence Traces

• Source citations

• Supporting snippets

• Spatial/temporal references

Evidenc

[1] Sentinel-2 IMG (2022-08-31)

[2] Drone IMG_0451 (2022-09-01)

[3] Report.pdf (p. 12)

...

Review Decisions

• Human-in-the-loop verification

• Accept/ Revise/ Reject

• Decision rationale

Decision

✓ Accept

✓ Revise

✗ Reject

Rationale: ...

Reports

• Structured outputs

• Maps, tables, figures
