

Trace-Grounded Diagnostic Panel: Prototype Traces

Four representative traces with key signals and interpretations for error analysis and review prioritization.

1 Retrieval / Display Success

Trace ID: T-RD-001

SUCCESS

Query

"Flooding in Kohistan, Pakistan (2022)"

Top Candidates (100)

100 candidates returned

Selected Tile Layer

Key Signal

- 100 candidates retrieved
- Relevant tile layer selected

Interpretation

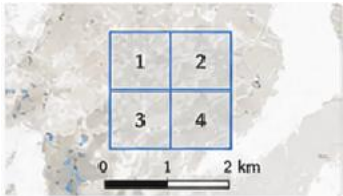

Retrieval and map display performed as expected.

2 Local Assessment (High Severity)

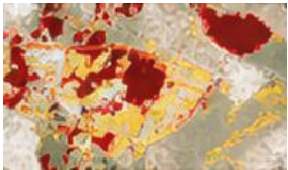

Trace ID: T-LA-017

LOCAL OK

AOI Overview (4 Tiles)

Predicted Damage (High)

Key Signal

- Severity: High
- Area: 0.371 km²
- Features: 60
- Tiles Used: 4

Interpretation

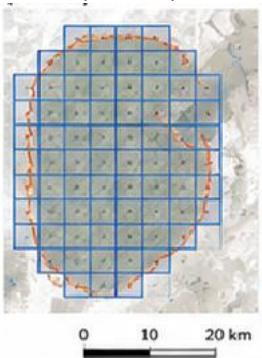

Consistent local assessment with high severity and focused spatial footprint.

3 Wide Assessment Drift (Over-Extent)

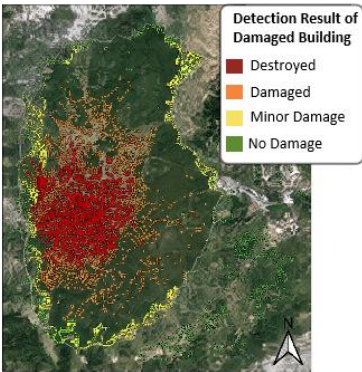

Trace ID: T-WD-023

DRIFT

AOI Overview (35 Tiles)

Predicted Damage (Critical)

Key Signal

- Severity: Critical
- Area: 6091.076 km²
- Features: 6
- Tiles Used: 35

Interpretation

Suspicious over-extent with few supporting features across manytiles; likely drift.

4 Backend Failure (Missing Tile)

Trace ID: T-BF-009

BACKEND FAIL

Routing & Request

- Correct tile routing
- Tile URL constructed

Backend Response

HTTP 500 Internal Server Error or
HTTP 404 Not Found (missing tile URL)

Impact

- Tile not retrieved
- Downstream assessment unavailable or incomplete

Key Signal

- Routing: Correct
- Response: HTTP 500/404
- Missing Tile URL

Interpretation

Infrastructure failure prevented tile retrieval; assessment impact is technical, not model behavior.
